

**Brief Description:**

SULPHO TOBIAS ACID(2-Naphthylamine-1,5-disulfonic acid)

Formula Weight: 303.30

Molecular Formula: C<sub>10</sub>H<sub>9</sub>NO<sub>6</sub>S<sub>2</sub>

**Product Attributes:**

Related attributes of SULPHO TOBIAS ACID:

Brand Name:SULPHO TOBIAS ACID(2-Naphthylamine-1,5-disulfonic acid)

Model Number:2922

CAS No.:171570-11-9

**Detailed Description:**

Detailed introduction to SULPHO TOBIAS ACID:

SULPHO TOBIAS ACID(2-Naphthylamine-1,5-disulfonic acid)

It's a white prism-like crystal. Shows navy blue fluorescence

when dissolved in Sodium hydroxide solution, micro-soluble in water, difficult to dissolve in concentrated sulfuric acid.

Usage: It is used for reactive dyes, sensitization materials and intermediates for organic dyestuffs
